TISSUEGNOSTICS
PRECISION THAT INSPIRES

TissueGnostics (www.tissuegnostics.com) is an Austrian company focusing on integrated solutions for high content and/or high throughput scanning and analysis of biomedical, veterinary, natural sciences and technical microscopy samples.

We are looking for a GUI/front-end software engineer to work on the design and development of an an innovative, cross-platform (desktop + web) interface for our next generation of products. You will join our Vienna team and work in close collaboration with the lead project developer and with our application specialists.

Your role will entail finding and implementing user-friendly, efficient solutions that exploit state-of-the-art technologies, such as OpenGL/WebGL, and to develop the associated unit testing code. You can choose to work in either a Windows or Linux environment.

Requirements

- Degree in Computer Science (Software Engineering)

- Experience with GUI design (desktop and/or web)

- Experience with JavaScript and/or C++

- Excellent communication skills

Desirables

- Experience with RESTful API services

- Experience with OpenGL/WebGL and CUDA

- Experience with TypeScript and Python

This is a full-time, permanent position based at our headquarters in Vienna, Austria. The minimum gross salary will be EUR 35.000,-- p.a.

Please send your application to: office@tissuegnostics.com

Working in Vienna

The rating agency Mercer has elected Vienna as "City with highest living quality in the world" for the 8th year in line! https://www.mercer.com/newsroom/2018-quality-of-living-survey.html
